

COEN/ELEC 390 Definition of Done Checklist

About the Document

Definition of Done (DoD) is the exit criteria to determine whether a product backlog item (PBI) is complete. DoD is a checklist of features and activities, for example, writing code, unit testing, integration testing, design documents, etc. that demonstrates that the PBI has been completed and can be marked as Done. DoD is crucial to a scrum team. It is the key to delivering quality product. DoD also serves as a good reporting mechanism for scrum team members. It helps to say that “This feature is Done”. Using DoD as a reference, a team member can effectively update other team members and product owner of the state of a PBI.

DoD may vary from one scrum team to another, but must be consistent within one team. To ensure consistent quality, it is important for a scrum team to identify its own DoD and stick with it. Any alteration of DoD should be communicated to the team members immediately.

Document Structure

The COEN/ELEC 390 Definition of Done checklist should have the following structure

1. Definition of Done criteria
2. DoD validation for Product Backlog items.

1 Definition of Done criteria

This section defines a list of items that make up the DoD checklist for the team. Following is the most common items that make up a DoD checklist

Note: This is just a partial list of the possible items that can be included in the DoD checklist. Please identify your teams DoD checklist in this section.

- ✓ Produced artifact (code/document) for the PBI
- ✓ Requirements mentioned in PBI are satisfied
- ✓ Acceptance criteria(s) for PBI are satisfied
- ✓ Unit tests performed and passed
- ✓ Integration tests performed and passed
- ✓ PBI artifact checked in into version control
- ✓ Project builds without errors
- ✓ Peer code review performed
- ✓ Design Document updated
- ✓ Test Document updated
- ✓ End-User documentation updated

2 Definition of Done Validation

This section will document the DoD checklist validation for each PBI that was marked as completed.

Story ID: <ID of the user story as mentioned in product backlog>	
User Story: <brief description of user story>	
DoD checklist for this PBI: <checklist from Section 1>	Status
1.	<Done/Not Applicable>
2.	<Done/Not Applicable>
3.	<Done/Not Applicable>
n.	<Done/Not Applicable>
