

LECTURE 8

Roles and Responsibilities

COEN / ELEC 390

Acknowledgement

- The concepts in these slides are based on the textbook:

Essential Scrum, A Practical Guide to the Most Popular Agile Process
Kenneth S. Rubin, Addison-Wesley, 2013.

Roles and Responsibilities

Product Owner

- Central point of product leadership
- Responsible for what gets built and when
- Presents a clear vision
- Ensures the most valuable work is being done

Scrum Master

- Oversees the implementation of Scrum
- Acts as a facilitator of the process
- Removes obstacles

Dev Team

- Cross-functional team of people who designs, builds and tests the product
- A self-organized team
- Small in size but can be organized into several teams

Product Owner

- Product owner sits between the stakeholders and customers, users and the development team.
- The product owner is the single voice of the entire stakeholder community, internal and external.
- The PO's responsibilities include
 - Manage economics (adjust budget, time, and scope)
 - Participate in planning
 - Groom the Product Backlog
 - Define & Verify Acceptance Criteria
 - Collaborate with Development Team
 - Collaborate with Stakeholders

PO Characteristics

Essential Scrum, A Practical Guide to the Most Popular Agile Process
Kenneth S. Rubin, Addison-Wesley, 2013.

FIGURE 9.5 Product owner characteristics

Who should be a product owner?

TABLE 9.1 Product Owners for Different Types of Product Development

Development Type	Candidate Product Owner
Internal development	Representative/customer from the business area benefiting from the solution
Commercial development	Internal proxy for the actual customers and users (typically a product manager, product marketer, or project manager)
Outsourced development	Representative/customer from the company paying for the solution and receiving the benefits
Component team (architectural development)	Typically a technical person who can best prioritize the backlog of technical items

Essential Scrum, A Practical Guide to the Most Popular Agile Process
Kenneth S. Rubin, Addison-Wesley, 2013.

Product Owner Team

- Every Scrum team must have a **single person** who is identified as the product owner and is the only person empowered and accountable for fulfilling the product owner responsibilities.
- PO **too busy**: create deputy POs reporting to and accountable to PO, with sufficient skills and authority to do their jobs.
- Product **too big**: break product into smaller pieces each with a Chief PO and a PO per piece.
- A **PO proxy** is a person enlisted by the product owner to act on his behalf in particular situations (e.g., when the product owner spends a great deal of time meeting **with customers** and users).

Scrum Master

- The ScrumMaster is focused on helping everyone understand and embrace the Scrum values, principles, and practices.
- The ScrumMaster acts as a coach to both the development team and the product owner.
- Helps the Scrum team and the rest of the organization develop their own high-performance, organization-specific Scrum approach.

Principal Responsibilities

- Coaches the Scrum team including the PO on how to use the Scrum process
- Helps the team become more effective
- Ensures the team adheres to the Scrum values, principles, and practices
- Protects the dev team from outside interferences
- Removes impediments that inhibit the team's productivity
- Helps others understand the need for change, the impacts of Scrum outside of the Scrum team, and the broad-reaching benefits Scrum can help achieve.

Characteristics/Skills

Development Team

- The development team works to produce the working product functionality in each sprint.
- Main responsibilities:
 - Plan the Sprint
 - Perform Spring Execution
 - Inspect & Adapt Each Day
 - Groom the Product Backlog
 - Review and retrospective

Characteristics/Skills
